

## 58<sup>th</sup> Annual Canadian Trace Organic Workshop THIRD ANNOUNCEMENT

The 58<sup>th</sup> Annual [Canadian Trace Organic Workshop](#) (CTOW) held in Vancouver, British Columbia is quickly approaching. This is the third call for participants to register for oral presentations 20-30 minutes long. As this is an informal scientific meeting, presentations do not need to be highly polished. Poster presentations will also be accepted. As always, we strongly encourage students to participate and present!

**Vogon Labs Student Sponsorship:** There are still spots remaining for students who register and present to have their registration fee paid courtesy of [Vogon Labs](#) (please indicate on the registration form below if you are a student).

If you are planning to attend, please submit your registration as soon as possible, even if your payment will be submitted later. This will help the organizing committee immensely.

The workshop payment link can be found on the [CTOW webpage](#). Acceptable forms of payment are all major credit cards and PayPal account. The registration cost for the workshop is \$250.00 (\$50.00 for students).

**Deadlines:**     **March 30** – [Hilton Vancouver Metrotown](#) booking deadline. The workshop rate has been secured at \$259/night. If you wish to extend your stay, the special rate will be available 3 days prior to 3 days after the conclusion of the workshop given hotel availability.

**April 17** – Workshop registration

Due to a scheduling conflict, the mixer will no longer be held at the Hilton on the evening of Tuesday, April 28, 2026, but an alternative venue is nearly sorted and will be announced shortly.

The social event held on the evening of Wednesday April 29 will be held at Flyover Canada at Canada Place, where we will be undertaking the [Awaken Canada](#) experience! Following that, an evening filled with food, drinks, and discussions will take place at [SteamWorks](#). This will include the presentation of the Caledon Award.

This long-standing workshop provides an opportunity to network and exchange ideas regarding trace organic analytical methods and research (wide range of testing, sample types and projects) with your colleagues.
